PIÙ ESPULSIONI"
05 SETTEMBRE 2018**

Migrants, Salvini: "Landings down, now more expulsions"
5th September 2018

A SHORT STORY: DOMENICO LUCANO AND THE RIACE MODEL, THE ALTERNATIVE ROUTE FOR MIGRANTS ENDED UP UNDER ACCUSATION

The Riace model

Domenico Lucano is the man who invented the «Riace model»: a method of hospitality management, which is known all over the world.

The *Fortune* magazine in 2016 puts him in the list of the 50 most influential leaders in the world.

But in what does the “Riace method” consist?

The transformation of a problem into a solution.

The migrants to Riace stopped being a burden to become the engine of a moribund economy. They are hosted in abandoned houses of a village that have soon become a marvellous oasis of interculturality.

**Accusation:
facilitating
immigration.**

"Work grants" and economic self-sufficiency

The Riace method is clever precisely in the socio-economic management of migrants, it made committed and productive citizens. The 35 euro per capita for the support of refugees and asylum seekers are transformed into so-called "job grants" that are turned into cooperatives - including also citizens of Riace - which give the opportunity to these men and women to learn a trade that assures them a small salary.

A network of affiliated businesses has also been set up, which allows migrants to provide for their household salary with that salary.

SITUATION IN OUR VALLEY : VALLE DI SUSA

The reception in Val di Susa was managed in a very intelligent way, thanks to micro-reception projects that allow you to enter small groups of refugees in many of the cities of the valley, thus avoiding the confusion that can lead to a large group of foreign people in a small place, where people are not used to this, small groups have been very well involved, thanks to work projects and laboratories.

In the *Osservatorio Immigrazione*, we work on the “**Frontiere**” project and we are currently active along the borders between Italy and other European countries:

- Ventimiglia
- Como
- Udine
- Trieste
- Claviere/Oulx/Bardonecchia
