Stereotypes and generalisation? Because of these terms exist, lots of innocents can become victims of discrimination. ☹️

**Keep in mind:** People can choose what life they want to lead, but no one has the chance to choose where they want to be born. You mustn't let yourself to judge, to discriminate. Even if you are religious or not, when the misery says hi, there will be only a person in front of you.

Thank You  
For Your  
Attention! 😊
