Thursday - a trip to Sumava mountains

In the morning we visited environmental education centres and saw exhibits of wildlife. Where we could see the wild animals' skeletons and listen to the sound of animals. After we walked in the national park. We were walking in the wood when we saw deers , roes and lynx. It was amazing because we saw in their natural environment. After the trip we had free time, we went to a patisserie and we ate some traditional Czech cake and drank hot tea. After this we went a pilgrimage site, Mourenec church, by bus. In the church one of the teachers talked about the church's history-it was interesting-some Czech girls sang. Then we went the Annín Glassworks. This is one of the longest running glassworks in Czech Republic. The exhibition represents the production of the Anne's glassworks from the turn of the 18th and 18th centuries until the recent past, and it also introduces the life of glassmakers and glass cutters. And we could go in the hut, where a man talked about the glass-blowing, presented is also and we tried it.
